RAZON

AN ISO 9001:2015 MANUFACTURER

Razon Engineering Company Private Limited is a company run by highly skilled team of technocrats having an experience of past several decades in chemicals

The Company's management is overseen by a team of highly qualified entrepreneurs comprising of:

Mr S.R.Chherawalla MD & CM; B.E.Metallurgy, winner of prestigious Govt. of Maharashtra Merit Scholarship.

Mr S.S.Chherawalla Dir Marketing, B.Tech Production Engineering.

Mr B.S.Chherawalla Dir Finance, Chartered Accountant.

Razon has been associated with the steel since 1976, manufacturing highly innovative products primarily to enhance the quality of products, ease of manufacturing and economy.

Since 1991 the company has been manufacturing the entire range of construction chemicals, and since the previous decade, RAZON has been manufacturing emulsions for industries like Paper, Textile, Thermoplastics and Adhesives industries.

The Company with world class R&D and manufacturing facilities, is an ISO9001:2015 accredited company. The company products command very high esteem for technology, innovation and quality, which bears testimony to the Company's manufacturing acumen.

World class Company's manufacturing processes wherein every product is manufactured out of finest quality raw materials under stringently monitored process parameters yield finest quality end products

RAZON produces a large range of chemicals for GFRC, a few of which have been mentioned here for brevity

INDUSTRY	PRODUCT	APPLICATION
MOULD RELEASE	PIPA 2 WC	White coloured, clear on drying, non-staining release agent for clean release of GFRC from mould, smooth silky finish of GFRC. Does not stain/ bond to the GFRC, providing natural color to the GFRC product.
SUPERPLASTICIZER	VTNB SP	Low dosage superplasticizer for producing highly flowing mortar, with high strength and ductility. High water reduction and highly fluid properties ensure that the mortar fills the most intricate designs, ensuring no pin holes in the product. You achieve a high quality GFRC product with no rejections.
STRENGTHNER	LTX C 52	Latex product for producing highly tough and durable GFRC products. Prevents breakages in the GFRC product, improves strength toughness and hardness in your Product.
HARDNER	VTNB E 4	Speeds up the hardening and strengthening of the mortar. Ensures speed of production, quick de-moulding times and lesser curing periods.
SEALER	VTNB L 41N	Clear “wet look” “HD color effect” sealer for GFRC, which does not allow the water to wet the article, maintaining new-ness in your product
EPOXIES	P.A.MORTAR TH-4	EPOXY mortar for grouting of steel inserts in concrete
	ANCHOREX EPB	Liquid epoxy bonding agent for multiple applications.
	RAZON BOND 40	Epoxy putty for bonding GFRC to structure/ and for any other application.
	RAZON BOND 45	Clear Liquid epoxy for repairs and invisible bonding of structural elements.

We at RAZON are experts in Chemical products, and our tech team delivers well researched products to enhance your product quality, speed and economy, which in turn they work out to be better, more effective as well as more economical than standard industry products. Reach out to us to experience it.
